About Me

Third-year Computing and Artificial Intelligence student at Cairo University with a strong foundation in Object-Oriented Programming, Data Structures, Databases, and Problem Solving. Hands-on experience in backend development using Python, Django, Flask, Node.js, and Express.js, with practical experience building RESTful APIs and database-driven applications. Seeking a Backend Internship to apply my programming fundamentals and gain hands-on experience building and improving real-world software systems.

Education

Cairo University – Faculty of Computers and Artificial Intelligence	2024 – 2028
B.Sc. in Computing and Artificial Intelligence	Cairo, Egypt

Projects

Librarium (Library Management System)	2026
<i>Team project Node.js, Express.js, MongoDB, REST APIs</i>	

- Developed a full-stack library management system with a Node.js/Express.js backend and MongoDB database.
- Implemented RESTful APIs for authentication, book management, borrowing, returning, search, and user operations.
- Implemented role-based access control, CRUD operations, and secure user authentication.
- Designed backend logic for borrowing workflows, waitlists, notifications, and database interactions.

Spendo – Budget Management Application	2026
<i>Team project Python, Django, SQL</i>	

- Developed a Django-based budgeting application for managing personal financial data and expenses.
- Implemented backend functionality, database models, CRUD operations, and application logic using Python and Django.
- Worked with relational databases to store, retrieve, and manage application data efficiently.

Smart Corporate Workspace & Resource Hub	2026
<i>Team project Python, Flask, SQL</i>	

- Developed a Flask-based application for managing workspace resources, reservations, members, and equipment.
- Implemented backend routes, database operations, and application logic using Flask and SQL.

13 Tic Tac Toe Variants	2025
<i>Team project C++, OOP</i>	

- Developed multiple Tic Tac Toe game variants using C++ and Object-Oriented Programming principles.
- Applied classes, objects, encapsulation, inheritance, and structured problem-solving to implement game logic.

Technical Skills

Programming Languages: Python, C++, Java, JavaScript
Backend Development: Django, Flask, Node.js, Express.js, RESTful APIs
Databases: MongoDB, MySQL, SQL
Core Computer Science: Object-Oriented Programming (OOP), Data Structures, Algorithms, Problem Solving, Debugging
Tools & Technologies: Git, GitHub, Postman, Bash, Linux, Kali Linux
Web Technologies: HTML, CSS, Bootstrap, Angular

Certifications & Training

• MEAN Stack Web Development Training – NTI	2026
• Amazon Junior Software Developer Professional Certificate – Coursera (<i>In Progress</i>)	2026
• Web Development Bootcamp – Udemy	2026
• Huawei Certified ICT Associate – Artificial Intelligence (HCIA-AI) – Huawei	2025
